# Canid Specialist Group Resources

## How do we communicate?

### <http://www.canids.org>

The official IUCN/SSC Canid Specialist Group (CSG) website, with relevant information on the CSG membership and *modus operandi*. The site hosts all CSG publications, including action plans, species accounts, complete bibliographies, bulletins, short news and announcements. The CSG maintains a substantial collective library, and access to many titles is available through the site. Other CSG resources listed below are also hosted at the site.

### Canids-L

Canids-L is a free, rapid channel for communication among CSG members and other people directly involved in canid research, management or policy setting. The mailing list is open to anybody actively involved in canid conservation and research and other wild canid enthusiasts, providing a forum for discussion of new emerging conservation topics. Canids-L is moderated, and its traffic is kept relatively light, with postings not exceeding 100 per year. Types of news items appropriate for this list include, but are not limited to:

- News of new discoveries, outbreaks of disease or other mayor threats affecting canids
- Discussion of methodologies, techniques, and research equipment
- Inquiries from researchers regarding management and conservation strategies
- Reporting of rare events and comparison of experiences
- Abstracts of recent publications of interest to canid scientists
- News of scientific and conservation meetings.

Subscribe to Canids-L for the latest canid news. To subscribe simply send an empty email from your email account to: [canids-l-subscribe@maillist.ox.ac.uk](mailto:canids-l-subscribe@maillist.ox.ac.uk)

### Canid News Online

An electronic, peer-reviewed, scientific journal devoted to the dissemination of current research on all species of the Canidae. Its aim is to provide a forum for the exchange and publication of information, ideas and opportunities among all those concerned for the study, conservation and welfare of wild canids. Our goal is that Canid News should include high quality articles that not only convey the excitement of canid biology, but also inform upon conservation problems, and hopefully contribute towards their resolution. Manuscript submissions and peer review are handled by email and the content is posted exclusively on the internet, mirrored in another two sites.

## Action Plans

An important output of the CSG is the production of action plans for the conservation of canid species. In addition to this global canid action plan, and the original action plan published in 1990, the CSG has embarked in the production of detailed action plans for all threatened canid species. Plans on dholes and kit foxes will soon be added to the already published plans for the Ethiopian wolf and African wild dog:

— **Foxes, Wolves, Jackals and Dogs (1990)**

<http://www.canids.org/1990CAP/90candap.htm>

— **African Wild Dog Action Plan (1997)**

<http://www.canids.org/PUBLICAT/AWDACTPL/wldogtoc.htm>

— **Ethiopian Wolf Action Plan (1997)**

<http://www.canids.org/PUBLICAT/EWACTPLN/ewaptoc.htm>

## Canid Project Database (CPD)

An online information resource for canid conservation, providing detailed information of planned, on-going, or recently completed conservation projects on all canids. The CPD will be instrumental to the implementation of this action plan, by seeking to facilitate exchange of information between field projects, and develop contacts with potential sponsors and collaborators. The CPD is managed by Oxford University's Wildlife Conservation Research Unit. Projects can be concerned with any aspect of canid biology and/or conservation. This resource will soon be expanded to provide a searchable database of canid conservation practitioners. <http://www.canids.org>

## How can you help?

- Reporting any information of interest on threatened canid species
- Providing financial support to the CSG
- Assistance with the implementation of any of the Action Plans' projects.

## Other IUCN/SSC Publications

### IUCN Policies and Guidelines

Policies and Guidelines are published as booklets and offer scientifically-based conservation principles and guidelines to aid decision-making at both the global and national level.

### Monographs (arranged by topic)

- CITES
- Crocodiles
- Educational Booklets on Mammals
- Marine Turtles
- Plants
- Trade
- Others

### Occasional Papers Series

SSC Occasional Papers cover a broad range of subjects including conservation of groups of species in a particular geographical region, wildlife trade issues, and proceedings of workshops.
